WHAT IS WEB HOSTING ?

In order for your website to be seen online, you need a web hosting service. Web hosting services differ by how the servers are set up (i.e. the space allocated) and the type of access that people (aka hosting customers) have to them. Every website you've ever visited is hosted on a server. The main types of hosting are Shared, Dedicated, VPS and Reseller.

BIGBANG Information Technology Solutions is pleased to submit this business proposal for Dedicated Server to Bigbang in achieving its goals to deploy their website on dedicated infrastructure hosted in UAE, Dubai data centre.

MOBILE APPS
تطبيقات الهواتف

The growth in use of mobile devices has led to an explosion in the development of mobile apps. More than a million apps are available for sale or download through mobile software distribution platforms such as the Apple App Store and Google Play.

1. Design and developing IOS and Android apps.
2. Direct linking of applications with data management sites to ensure data sync between the site and the application.
3. Enter the system of push notifications on the application and give the customer full control over how to send it.
4. Purchase system included in the application.
5. Modern Designs, animation and sound effects.

ONLINE MARKETING
التسويق الالكتروني

We offer the service of managing paid advertising campaigns, whether with a pay-per-click "PPC" system or a pay-per-view "PPW" system, on various search engines as well as on social networking sites, and we offer you the right plan that, when implemented, will ensure success in the advertising campaign At the lowest possible cost, through the following:

Carefully study the product or service that you will provide to the customer.

Determining the target audience, knowing their interests, and studying it well in what is known as the consumer study.

Continuous monitoring of the advertising campaign.

Determine the right time to post your ad.
